

J4010 Heavy Duty Upright Piano Dolly

Designed for easy moving of heavy studio and upright pianos. Will accommodate any piano with dimensions not exceeding 13-3/4" in depth. Five (5") ball bearing wheels raise piano only 3/4" off the floor.

Installation Instructions

1. Raise one end of piano and place dolly underneath keeping dolly as close as possible to inside of piano toe block.
2. Repeat step one (1) on opposite end of piano.
3. It is recommended that dollies be secured to rear of piano as well as underside of piano with lag bolts, wood screws or bolts through holes provided in dollies. (Screws/lag bolts not included).

TOE BLOCK
